Volunteer gives big 10-4 to award

Ken McEachern says without the support of his wife Ruby and the strong backing of the local amateur radio community, he couldn't have become Communications Volunteer of the Year.

by KEVIN WATT

Ken McEachern calls himself a professional when it comes to operating amateur radios.

The Provincial Emergency Program (PEP) calls him the Communications Volunteer of the Year.

McEachern accepted a plaque in Victoria on May 4 at a PEP conference. The 72-year-old retired forestry communications tech says if he didn't have volunteers throughout his Central Okanagan zone, the information he gets from PEP wouldn't mean a thing.

What McEachern calls "poor man's Internet" is one of the only means of communication when the power goes out or the phone lines go down.

Fires, earthquakes and floods prompt volunteers like McEachern into action for emergency social services, the Red Cross and search and rescue.

"To look forward to these things means someone's going to be hit with a problem." He says he doesn't enjoy that part of the job, but he says, it does make life a little more interesting.

Last month, the power went out in Smithers and McEachern and four other amateur radio techs were

broadcasting within 10 minutes. When the phones shut off, the ambulance dispatcher in Kamloops lost contact.

Volunteer radio operators would have been the only means of sending emergency vehicles if the power hadn't been restored an hour later.

But what if the power couldn't be restored?

During the Y2K scare,

McEachern and his crew were out in full force. "We were on watch from 6 p.m. to 2 a.m. until they decided nothing was going to happen," he says.

Emergency radio centres were set up in Kelowna, Vernon, Salmon Arm and extra groups were on a separate repeater system in hospitals all over B.C.

In the case of an emergency, amateur radio can be

linked right across Canada.

"Amateur radio is the initial and last line of defense," says McEachern, "because they are independent and portable."

He continues with his award gripped firmly in his hand: "I wouldn't have been able to do this if I didn't have the support of my wife, Ruby, and the strong backing of the local amateur radio community."
