

*Go Full Speed Ahead with Redline's
Backhaul Bundles!*

AN-100: 2004 SuperQuest Award
Backbone/Edge Networking Equipment

Point-to-Point Backhaul Solutions in 3.5 GHz

Redline's AN-100 quickly established itself as a fast, reliable backhaul connection when launched in February 2004. This superior wireless backhaul system is available in your choice of specially priced bundles - the "Power Bundle" and the "Power Plus Bundle" (see details, below). And for a limited time, these bundles include high speed data up to 64 QAM. Whether you're a Local Exchange Carrier, a Wireless Internet Service Provider or a public operator requiring a fixed wireless backhaul system, you owe it to yourself to take a good look at our offerings, which deliver robust, high-bandwidth performance over extreme conditions and formidable distances.

Redline's **PTP Backhaul Power Bundles** are ideal for high-speed wireless multi-services backhaul. Using Redline's AN-100 system that delivers data throughput of 43 Mbps with 64 QAM modulation, the **PTP Backhaul Power Bundle** offers operators a cost-effective solution with an attractive ROI. The **Power Plus Bundle** adds support for up to 8 E1 or T1 ports.

But don't delay. This specially priced, limited-time offer won't be around for long. Call now to find out how to reduce your OPEX with the advantages of an OFDM based wireless backhaul solution.

- 1 Sector Controller Terminal (Model 100C)
- 1 Subscriber Terminal (Model 100S)
- High Speed Data (Up to 64 QAM modulation)
- Single AC
- Outdoor Radio
- IF and RF Cabling
- 1 ft Flat Panel Antenna and Mounting Bracket

- 1 Sector Controller Terminal (Model 100C)
